SUMMARY

3+ years of experience with full-stack web-based application development with Java and Angular. Always ready to adapt and quickly acquire new technologies and skills. To jump into the unknown and dive deep into the topic. To solve problems and pay attention to details. To put in serious work and take accountability.

WORK EXPERIENCE

Freddie Mac

Sep 2022 – Dec 2025

Consultant (through Hexaware)

McLean, VA

- Integrated CRM Dynamics with Spring Boot and Angular microservices, ensuring synchronized data flow.
- Developed and maintained 10+ microservices, focused on writing clean, well-documented and reliable code.
- Optimized existing codebase to enhance performance and minimize downtime.

Hexaware

Apr 2022 – Sep 2022

Junior Software Developer

Reston, VA

- Delivered a full stack application (Java + Angular + MySQL) supporting internal process management.
- Performed structural analysis based on functional requirements for the case study.
- Designed and implemented a RESTful application fully aligned with acceptance criteria.

Drum Risk Limited

Feb 2017 – Oct 2019

Commodity Inspector

London, UK

- Deployed to 8+ international sites to ensure contract compliance and protect client interests.
- Conducted 100+ quantity and visual quality inspections in line with client and industry standards.
- Prepared detailed reports based on inspection services meeting legal and regulatory requirements.

EDUCATION

University of Novi Sad

July 2014

Bachelor's degree in Geodesy and GIS

Novi Sad, Serbia

- technique and technology of land surveying
- processing of data collected in the field through applying computer sciences
- bachelor thesis - Use of SDO_PC in Oracle Database

SKILLS & INTERESTS
